AMBERG GEOvis 4.0

Platform for all your Geomonitoring Projects

GEOvis 4.0 makes your monitoring projects more efficient, more simple and more attractive for you and your customers.
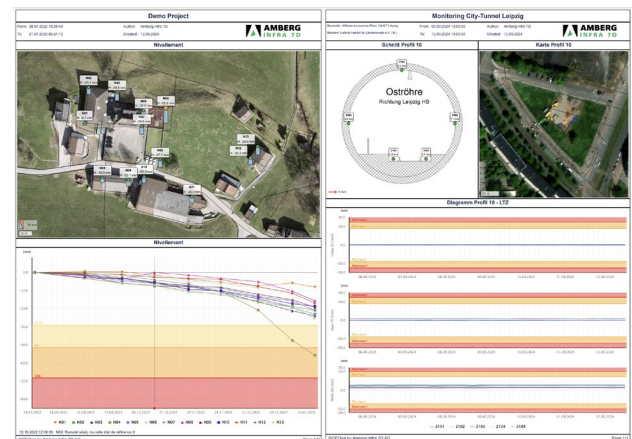

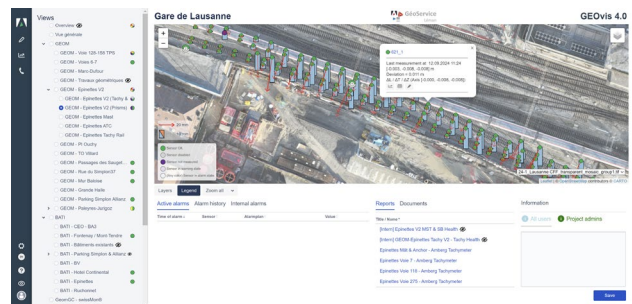

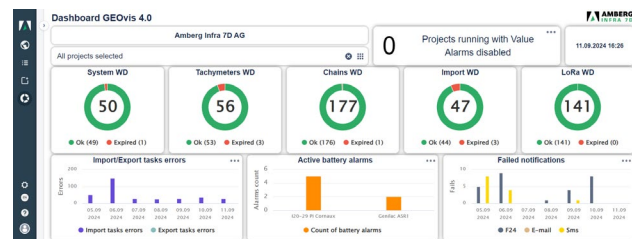

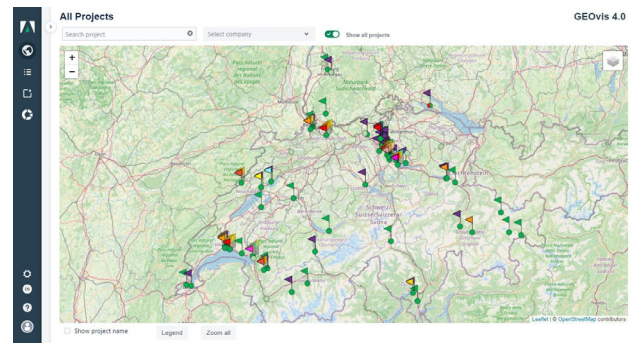

Revolutionize the way you monitor

- Whether you have a small construction site or large infrastructure projects, manual measurements or automated sensors - visualize your data with GEOvis 4.0 and give access to your clients.
- GEOvis 4.0 processes various types of survey data and offers a tailor-made solution for all construction professionals.
- The platform automates the data exchange with all types of sensors, IoT and external 3rd-party platforms.

Digital project supervision

- With GEOvis 4.0 you can efficiently supervise and administrate projects. Import, process, visualize and export measurement data anytime and from anywhere.
- Overview maps and dashboards show you the project status at a glance.
- Interactive maps and graphics give you important insights in an intuitive way.
- Virtual sensors will help you to extract and visualize information for deeper understanding.
- Give 24/7 access to your results on GEOvis 4.0 with customer-specific access rights and logins

Data control and alarming in real time

- Create individual measurement reports, fitting your preferences.
- Export measurement data, graphs and reports to third party platforms.
- Send automated daily or weekly reports to your customers.
- The integrated alarm function enables you to react to limit exceeding in real time.

DISCOVER THE FUTURE OF MONITORING WITH GEOvis 4.0

Licensing

Pick the plan that fits your monitoring needs

BASIC	ADVANCED	EXPERT	ENTERPRISE
Ideal to begin your GEOvis journey.	**Upgrade your projects with automatic monitoring!**	**Stay safe with Alarms! Enjoy the peace of mind.**	**GEOvis installed on your Server?**
With this license you can manage up to 10 manual monitoring projects. All reporting features are fully available so you can extract all the valuable insights.	Do you need to send data from remote locations, automatically import and visualise? Set up virtual sensors? Then this is the right license for you!	Be informed always when the thresholds are exceeded. Red light, SMS or e-mail will inform you immediately when something is happening.	If it is important for you to have the data on your own server or you have some other special needs - talk to us. We will find a solution.
